

BNB X Space on AI – Mar 19, 2026

Host(s) & Guest(s) <i>[Make sure hosts join with their brand account]</i>	Host(s): - BNB Chain: https://x.com/BNBCHAIN - Walter: https://x.com/lclwalter Guest(s): https://x.com/virtuals_io https://x.com/l3_Cubed https://x.com/honeycombchain https://x.com/flapdotsh
Topic	A New Era of Agentic Commerce
Date & Time	Mar 19, 2026 1:00 PM UTC
AMA Link	
Agenda & Questions <i>[Customize questions based on topic, guests, timing of market etc.]</i>	1. Welcome & introductions (5 min) - Quick host intro & Why this conversation matters now - The growth of AI Agents on blockchain is also getting exciting and fun, working towards the goal of autonomous AI Agents building their own ecosystems and economies, blockchains like BNB Chain will be the perfect place to do so! - Welcome x402, 8004, 578, openclaw skills and also 8183 - Now we have more interesting stuffs to share: We've got teams today who are actively building in this space so let's get into it - NFA/DYOR Disclaimer: "Nothing said here is financial advice and users should do their own research before interacting with Web3 protocols." - Each project/speaker introduce themselves and the projects they are representing: - Virtuals, l3, HoneyComb, Flap

2. BNB Chain Agent SDK (20 min)

- **(Context: Walter)**

Highlights about BNB Chain Agentic SDK and ERC 8183 deployment

The SDK is an enhancement implementation of ERC-8183 and compatible with both ERC-8004 and ERC-8183 that allow devs to register, discover, and manage AI agents on-chain using the ERC-8004 standard. This benefits builders and founders looking to integrate autonomous AI agents into their dApps using standard EVM architecture without writing complex escrow logic from scratch and monetize AI models with guaranteed payouts.

- **(Introduction: All: Virtuals, I3, HoneyComb, Flap)**

- To let our audience understand the synergies better, explain briefly what are you deploying into the BNB Chain's ecosystem and why is BSC a good fit? **(more retailer focused talks)**

3. Deeper dive into sub-topics (20 min)

- ERC-8183

- **(Virtuals)** The team co-developed ERC-8183 with the Ethereum Foundation's dAI team. Hence, let's dive deeper and talk about the significance of this commerce layer and how it will push the agent economy forward, how can developers leverage on this? **(perhaps more dev focused talks)**

- Skills/Platform

- **(I3)** I3 recently deployed an intelligence economy where models are assets and OpenClaw Layer turns them into execution. Could you explain more about this and how it benefits users on BNB Chain?
- **(HoneyComb)** Honeycomb has been actively building an agent-first platform where agents and humans talk, build, and compete. It allows autonomous agents to coordinate onchain. Can you explain the features and how it's different from other platforms out there?
- **(Flap)** Flap AI Oracle was recently launched to enable AI prompts in smart contracts and call for external tools. Why build an oracle and how is it important to the builder ecosystem?
- **CTA (Walter):** Devs and community can try-out different skills & platforms developed.

4. Closure (10 min)

- Share a final takeaway and the future plans of your project/products on BNB Chain (feel free to share your socials)

BNB Chain AMA - Guest Guidelines

So you've been invited to collaborate on an AMA with BNB Chain? Great! We can't wait to work with you to better inform and educate the community.

Before attending the AMA, please familiarize yourself with the below guidelines. Adherence to these guidelines is mandatory for all guests participating in BNB Chain AMAs.

Do	Do Not
1. Closely familiarize yourself with the questions and topics that are shared with you ahead of your AMA and prepare answers and examples in advance a. Sync any script additions with BNB Chain before the session 2. Join the BNB Chain AMA from your official project Twitter account, not from personal accounts 3. Share the core user benefits offered by your project as they correspond to the AMA theme 4. Stick to the theme of the AMA - this is what listeners want to hear about! 5. Quote tweet the BNB Chain announcement of the AMA and share with your community in advance 6. Perform sound and tech checks in advance and show up 10 mins early to the AMA 7. Share any questions or concerns with your BNB Chain POC via Telegram in advance	1. Solicit participation in a token / NFT launch or other financial programs 2. Make any major project or business announcements from your side in our AMA 3. Mention details of your token, coins or NFTs that include where to buy, what the price is, etc. 4. Introduce side-projects unrelated to the core theme 5. Get too techy in your explanations. Focus instead on user benefits 6. Criticize any other industry players or protocols 7. Provide any firm predictions or recommendations that could be interpreted as financial advice 8. If you commit to providing rewards to users (e.g. for providing their questions for this AMA), ensure you follow through in a timely fashion 9. Don't claim to be the "exclusive host" of the AMA - you are doing this collaboratively with BNB Chain

Thank you for paying careful attention to the BNB Chain AMA guest guidelines. We look forward to the conversation!
